

NOTES ON FLORIDA'S ENDANGERED AND THREATENED PLANTS¹

Nancy C. Coile²

The **Regulated Plant Index** is based on information provided by the Endangered Plant Advisory Council (EPAC), a group of seven individuals who represent academic, industry, and environmental interests (Dr. Loran C. Anderson, Dr. Daniel F. Austin, Mr. Charles D. Daniel III, Mr. David M. Drylie, Jr., Ms. Eve R. Hannahs, Mr. Richard L. Moyroud, and Dr. Daniel B. Ward). Rule Chap. 5B-40, Florida Administrative Code, contains the "Regulated Plant Index" (5B-40.0055) and lists endangered, threatened, and commercially exploited plant species for Florida; defines the categories; lists instances where permits may be issued; and describes penalties for violations. Copies of this Rule may be obtained from Florida Department of Agriculture and Consumer Services, Division of Plant Industry, P. O. Box 147100, Gainesville, FL 32614-7100. Amended 20 September 2000, the "Regulated Plant Index" contains 415 endangered species, 113 threatened species, and eight commercially exploited species.

Descriptions of these rare species are often difficult to locate. Florida does not have a single manual covering the flora of the entire state. Long and Lakela's manual (1971) focuses on the area south of Glades County; Clewell (1985) is a guide for the Panhandle; and Wunderlin (1998) is a guide for the entire state of Florida but lacks descriptions. Small (1933) is an excellent resource, but must be used with great care since the nomenclature is outdated and frequently disputed. Clewell (1985) and Wunderlin (1998) are guides with keys to the flora, but lack species descriptions.

Distribution maps (Wunderlin and Hansen, 2000) are available over the Internet through the University of South Florida Herbarium [www.plantatlas.usf.edu/]. These maps were invaluable for determining county distributions as was information from Florida Natural Areas Inventory.

The following tables were compiled to provide a convenient source of descriptions and other information on Florida's endangered, threatened and commercially exploited plant species. Five columns of information are provided: scientific name, references, common names, family, and descriptions.

This publication consists of five sections: **endangered species, threatened species, commercially exploited species, family affiliation, and index to common names**. The table uses the same numbering sequence as that used by the "Regulated Plant Index."

Many thanks are given to: Penny L. McCurry for help with publishing matters; Sharon E. Gatlin for help with the index; and especially to Wayne N. Dixon for his helpful editing; all these are with the Florida Department of Agriculture and Consumer Services/Division of Plant Industry.

Thanks are given to the following persons who provided information: Keith Bradley and George D. Gann, The Institute for Regional Conservation; Chuck McCartney, orchids; Gary D. Knight, Linda G. Chafin, Vicki Garland and Barbara Lenczewski, Florida Natural Areas Inventory; Roger L. Hammer, Metropolitan Dade County Park and Recreation Department, Natural Areas Management; Loran C. Anderson, Florida State University; Daniel F. Austin, Florida Atlantic University; David L. Martin, U. S. Fish and Wildlife Service; Bruce D. Sutton, DPI, carnivorous plants; Kathy Craddock Burks, Department of Environmental Protection; Donald Drapalik, Georgia Southern University, angle-pods; John D. Tobe, Department of Environmental Protection, magnolias; Robert R. Haynes, University of Alabama, slender nailad.

¹ Florida Department of Agriculture and Consumer Services, Bureau of Entomology, Nematology and Plant Pathology - Botany Section, Contribution No. 38, 2nd edition, 2000.

² Botanist, FDACS, Division of Plant Industry, P. O. Box 147100, Gainesville, FL 32614-7100.

DESCRIPTION OF COLUMN CONTENTS: The columns used in this publication are described below.

SCIENTIFIC NAME lists the species by the numerical order in which the species are listed in the "Regulated Plant Index." Author names are often abbreviated.

Bold type indicates that the species is on the federal list of endangered or threatened plants. The date of inclusion as a federally listed plant is provided immediately following the scientific name.

When there are illustrations in commonly available references a symbol (or) is placed in the lower left corner. Page numbers are given for Bell and Taylor (1982), Scurlock (1987), and Taylor (1992). Photographs in the DPI poster and in Nelson (1994) are cited by plate number. There are no page numbers for Chafin (2000) or for Wunderlin and Hansen (2000). For additional photos, check the atlas website of Wunderlin and Hansen; many species will have photographs.

If the species is considered **endemic** to Florida (95% of all known occurrences are in Florida), then the term "endemic" is given in the lower right corner. Range distribution was obtained from Gleason and Cronquist (1991), Radford *et al.* (1968), Luer (1984), and Correll and Correll (1978).

REFERENCES provides the last name of the author(s) and then page(s) devoted to the species. When species are covered by Clewell (1985), Correll and Correll (1982), Long and Lakela (1972), Small (1934), Ward (1979), or Wunderlin (1998), those authors will be listed if applicable. Other references may also be listed. Complete reference citations are provided at the end of this publication.

If line drawings are present in a reference, the symbol is shown. Small (1934) provides excellent illustrations, but these usually show only floral details. Other illustrations are often detailed and show plant habit as well as floral and fruit details. The symbol indicates that a photograph is present. Lakela and Long (1976) has black and white photographs.

COMMON NAMES: these are names used in the vernacular. Sometimes the common name is descriptive and very useful. However, the common names are often confusing because the same name may be used for different taxa, or a species may have many different common names. This listing of common names is not meant to be exhaustive.

FAMILY encompasses similar genera and excludes dissimilar genera. When two family names are acceptable (synonymous) according to the International Code of Botanical Nomenclature, both will be listed. There are eight families which have an alternative name: Palmae or Arecaceae; Gramineae or Poaceae; Cruciferae or Brassicaceae; Leguminosae or Fabaceae; Guttiferae or Clusiaceae; Umbelliferae or Apiaceae; Labiate or Lamiaceae; and Compositae or Asteraceae.

Common names for the families usually follow Lawrence (1951). The division for Leguminosae into three subfamilies corresponds to Mabberley (1997). The tribes for the Compositae complies with Cronquist (1980). Common names for pteridophyte families are found in several sources, including FNA.

DESCRIPTIONS provides characters which will help distinguish this species from similar species. The first category is type of plant (tree, shrub, vine, annual herb or perennial herb). In succeeding order, characteristics are given for the following categories: stem, leaf, flower, fruit characters, habitat, locale, and time of bloom. Several abbreviations are used to save space: **lvs**= leaves; **lflets**= leaflets; **cpd**= compound; **infl**= inflorescence; **flrs**= flowers; **frts**= fruits; **cos.**= counties.

The Florida Natural Areas Inventory (FNAI 1996) was used for habitat designations as were the referenced manuals and guides. Some of the habitats may sound esoteric, but are usually very appropriate. As an example, the solution holes in rockland hammocks mentioned in description of *Anemia wrightii* refer to dissolved areas in the limestone substrate of the rockland hammock habitat. When a county is not listed by the Atlas, the county is shown within parentheses.

TABLE OF CONTENTS

SECTIONS	PAGES
Endangered	1-62
Threatened	63-86
Commercially exploited	87-88
Family Affiliation	89-94
References	95-96
Index	97-122

This page is for notes.

PRESERVATION OF NATIVE FLORA OF FLORIDA: REGULATED PLANT INDEX

I. ENDANGERED PLANT LIST

SCIENTIFIC NAME	REFERENCES	COMMON NAMES	FAMILY	DESCRIPTIONS
1. <i>Acacia choriophylla</i> Benth.	Correll and Correll, 588 Isely, 8 Long and Lakela, 453 Ward, 38 [○] Wunderlin, 341	tamarindillo cinnecord	Leguminosae/ Fabaceae; legume family. Mimosoideae; acacia subfamily	tree to 9 m tall; spineless; lvs cpd, 1-3 pairs of segments, 4-8 pairs of lflets, lflets 1-2 cm long; petiolar gland circular and sessile; yellow flowers; stamens numerous; frt a woody legume with non-arilate seed; ecotone between rockland hammock and marine tidal swamp, coastal berm; Dade (escape) and Monroe cos.; summer.
2. <i>Acacia tortuosa</i> (L.) Willd.	Correll and Correll, 590 Isely, 7 Long and Lakela, 452 Wunderlin, 341	poponax	Leguminosae/ Mimosoideae [see above for common names]	shrubby tree to 5 m tall; stipular spines (may be fused at bases); lvs cpd, 4-8 pairs of segments, 15-20 pairs of lflets; petiolar gland elliptic; yellow flowers; stamens numerous; frt a slender moniliform, slightly curved, woody legume; hammocks on shell middens; Collier Co. (extirpated?)
3. <i>Actaea pachypoda</i> Elliott	Clewell, 460 Radford <i>et al.</i> , 456 [○] Small, 513, as <i>A. alba</i> [○] Ward, 127-128 Wunderlin, 298	doll's eyes baneberry necklace weed white baneberry	Ranunculaceae; buttercup family	perennial herb; lvs cpd; many white flrs with thick stalks which later become red; frts hard, white berries with blackish dot (persistent stigma); rich woods, slope forest, stream banks; Liberty Co.; Mar.
4. <i>Adiantum melanoleucum</i> Willd.	FNA, 128 Lakela and Long, 68 [○] Long and Lakela, 90 Small: ferns, 116,117 [○] Ward, 3-4 [○] Wunderlin, 40	fragrant maidenhair fern	Pteridophyta-- Adiantaceae; maidenhair fern family	fern; rachis hairy and dull; lvs to 80 cm long, margins finely and irregularly serrate, lf segments oriented at right angles to rachis and continuous with stalk; false indusium crescent-shaped, on segment margins; rockland hammocks, limestone sinkholes; Dade Co. (Monroe Co. record is an error.)
5. <i>Adiantum tenerum</i> Swartz	FNA, 127 Lakela and Long, 63 Long and Lakela, 90 Small: ferns, 121-123 [○] Wunderlin, 40	brittle maidenhair fern	Pteridophyta-- Adiantaceae; maidenhair fern family	fern; rachis smooth and shiny; lv segments fan-shaped, with a tiny white annular joint at base; sink walls, grottos, and limestone ledges; Alachua, Citrus, Dade, Hernando, Hillsborough, Marion, Pinellas, St. Johns and Volusia cos.

[○] = line drawing.[○] = photograph.

SCIENTIFIC NAME	REFERENCES	COMMON NAMES	FAMILY	DESCRIPTIONS
6. <i>Aeschynomene pratensis</i> Small A. <i>pratensis</i> var. <i>pratensis</i> is endemic to FL. Chafin var. <i>caribaea</i> Rudd is a tropical complex, widely distributed.	Isely, 185-186 Long and Lakela, 488 Small, 727⊕ Wunderlin, 341-342	meadow jointvetch	Leguminosae/ Fabaceae; legume family Papilionoidae; pea subfamily	perennial herb to 2 m tall; petiole 3-8 cm long; 20-24 lflets, with prominent midvein, entire; yellow to orange petals; legume with distinctly crenate lomenta; pineland margins; (Broward), Collier, Dade and Monroe cos. Blooms all year.
7. <i>Ageratum littorale</i> A. Gray FL, West Indies, Central America	Cronquist, 194 Long and Lakela, 870 Small, 1319⊕ Wunderlin, 604	Cape Sable whiteweek seashore ageratum	Compositae/ Asteraceae; daisy family tribe: Eupatorieae	herb; lvs opposite, succulent, glabrous; corollas blue; achenes 5-angled; pappus a tiny crown of scales; hammocks and along the shore; Monroe Co.- from Lignum Vitae Key to Key West.; all year.
8. <i>Agrimonia incisa</i> Torrey and A. Gray FL, SC, GA, MS	Clewel, 466 Radford <i>et al.</i> , 547 Small, 616 Wunderlin, 327	harvest-lice incised agrimony	Rosaceae; rose family. Spiraeoideae; spireaea subfamily	herb, to 1 m tall; stem unarmed; lflets 7-9, unequal, stipules prominent, terminal lflet less than 2.5 cm long, sessile and amber glands on lower leaf surface; hypanthium to 2 mm long; petals to 2 mm long; sandhills, woods and thickets; Alachua, Calhoun, Citrus, Escambia, Hernando, Jackson, Madison, Marion, Suwannee, Wakulla and Washington cos.; Sep-Oct.
9. <i>Aletis bracteata</i> Northrup Included in <i>A. farinosa</i> L. by Correll and Correll, Long and Lakela Wunderlin distinguishes the panhandle <i>A. farinosa</i> from <i>A. bracteata</i> . FL to New England and Ontario, west to WI and TX	Clewel, 351 Correll & Correll, 297-299⊕ Long and Lakela, 294 Radford <i>et al.</i> , 302⊕ Small, 316 Wunderlin, 205-206	bracted colic-root	Melanthiaceae; bunchflower family or, Liliaceae; lily family	perennial herbs with rhizomes; lvs mostly basal and linear, stem lvs reduced; stems to 60 cm tall; perianth white, 5-8 mm long, cylindric or constricted above the middle, slightly granular; capsule conic; pine rocklands, marl prairies; (Collier), Dade and Monroe [incl. Keys], cos.; all year.
10. <i>Alvaradoa amorphoides</i> Liebm. Atlas; Chafin S FL, Mexico, Central America, West Indies, South America	Correll and Correll, 737- 738⊕ Long and Lakela, 517 Small, 763-764⊕ Wunderlin, 386-387	alvaradoa Mexican alvaradoa	Picramniaceae, or Simaroubaceae; picramnia family, or quassia family	shrub or small tree; leaflets 19 to 51, 1-2.5 cm long, with appearance of <i>Amorpha</i> ; lvs alternate; flowers tiny, green or yellowish, in drooping racemes, pistillate racemes up to 13 cm long, staminate ones to 20 cm long; fruits samaras, densely pubescent; pine rocklands, rockland hammocks; Dade Co. (Monroe Co. record is error.)
11. <i>Amorpha crenulata</i> Rydb. Endangered Species Act, 1973; Fed. Register, 18 July 1985. Isely uses <i>A. herbacea</i> Walter var. <i>crenulata</i> (Rydberg) Isely. Wunderlin concurs. Chafin endemic	Isely, 73 Long and Lakela, 478 Small, 690 Wunderlin, 343	Miami lead plant	Leguminosae/ Fabaceae; legume family Papilionoidae; pea subfamily	shrub; to 3 m tall; not hairy; leaflets 25-33, crenulate (with small rounded teeth), terminal gland on leaflets; lflet stalks 1.5-2 mm long; corollas white, single petal 6 mm long; vacant lots, pine rockland, marl prairie, fire-maintained; Dade Co.; Feb-Aug.
12. <i>Anemia wrightii</i> Baker ex Hook. and Baker Chafin Florida, Cuba	Correll and Correll, 7 FNA, 118 Wunderlin, 38	parsley fern Wright's pineland fern	Pteridophyta-- Anemiaceae/ Schizaeaceae.	fern; less than 15 cm tall; 2-compound, papery to leathery, 2-4 pairs of segments; ultimate segments of sterile fronds ob lanceolate, very narrow at base and deeply toothed at tip; fertile fronds with sporangia on all segments, blade tissue lacking; solution holes in rockland hammocks; Dade Co.

SCIENTIFIC NAME	REFERENCES	COMMON NAMES	FAMILY	DESCRIPTIONS
13. <i>Aquilegia canadensis</i> L. [<i>A. canadensis</i> var. <i>australis</i> (Small) Munz is intended.] Nova Scotia to Saskatchewan, south to FL and TX	Clewel, 460 Gleason and Cronquist, 60 Radford <i>et al.</i> , 454-454 ^{♂♀} Small, 514 ^{♂♀} Ward, 130 Wunderlin, 298-299	columbine wild columbine	Ranunculaceae; buttercup family	herb; pendent red and yellow fls, complex structure with hollow spur; woodlands, Jackson, Liberty and Washington cos.; Mar-Apr.
14. <i>Arabis canadensis</i> L. Atlas ME to MN, south to FL and TX	Clewel, 339 Gleason and Cronquist, 192 Radford <i>et al.</i> , 510-511 ^{♂♀} Small, 572 Wunderlin, 311-312	sicklepod	Cruciferae/ Brassicaceae; mustard family	herb; median lvs not auriculate-clasping hairy; petals white to pinkish; fruit pod flattened, long and narrow; rich woods, limestone outcrops; Jackson and Liberty cos.; Mar-Apr.
15. <i>Argusia gnaphalodes</i> (L.) Heine [In 1998 Rule, listed as: <i>Tournefortia gnaphalodes</i> (L.) R.Br. ex Roem. and J.A. Schult.] Atlas; Bell and Taylor, p. 232; Scurlock, p.109 FL, West Indies, Mexico, Central America	Correll and Correll, 1208-1209 ^{♂♀} as <i>Mallotonia carolinianum</i> Long and Lakela, 731 ^{♂♀} Ward, 101-102 Wunderlin, 515	sea lavender (<i>Limonium carolinianum</i> is also sea lavender) bay lavender	Boraginaceae; borage family	shrub up to 2 m tall; lvs oblanceolate, to 10 cm long, with silky hairs, succulent; corollas white, tinged pink in throat; frt conical-ovoid, hollowed at base, cory; coastal dunes, coastal rock barrens; Brevard, Broward, Dade, (Martin), Monroe [Keys only], Palm Beach and St. Lucie cos.; all year.
16. <i>Argythamnia blodgettii</i> (Torr.) Chapman Chafin endemic	Long and Lakela, 558 Wunderlin, 391-394	Blodgett's wild mercury Blodgett's silverbush	Euphorbiaceae; spurge family	plants to 60 cm tall; hairs T shaped, with 2 arms; alternate lvs, to 4 cm long; fls meager; seed with caruncle; pine rocklands, wet margins and openings of hammock, coastal rock barrens; Dade and Monroe [Keys only] cos.; all year.
17. <i>Aristida simpliciflora</i> Chapman FL and MS	Clewel, 123-124 Hall, 232 Hitchcock, 480-481 Small, 94-96 Wunderlin, 86-89	Chapman's three-awn, southern three-awn	Gramineae/ Poaceae; grass family	perennial herb, to 1.1 m tall; sheaths not lanate; lvs flat, 1 mm wide, to 15 cm long, not villous at base; infl. 10-20 cm long, slender, few-flowered; spikelets paired, 1 pedicellate and 1 sessile; glumes 6-7 mm long, awned; lemma shorter than glumes, 3 awns, central awn 1-1.4 cm, basally reflexed with a semicircular bend, lateral shorter, spreading horizontally; moist pine woods, fields; Franklin, Hillsborough, Jackson, Okaloosa and Santa Rosa cos.; Oct-Nov.
18. <i>Aristolochia pentandra</i> Jacq. Chafin FL and West Indies	Correll and Correll, 439-440 ^{♂♀} Long and Lakela, 370 Small, 1281-1282 Wunderlin, 268-269	Marsh's Dutchman's pipe, coastal aristolochia, pitcher-plant	Aristolochiaceae; birthwort family	herbaceous vine; lvs cordate, 5-10 cm long; calyx tube swollen at base on one side (vs. middle), the flared part (limb) narrow and long -pointed, veined; 5 stamens; capsule globose; hammocks; Dade and Monroe [Keys only] cos.; all year.
19. <i>Aristolochia tomentosa</i> Sims IN to KS, south to GA, FL and TX	Clewel, 248 Gleason and Cronquist, 44 Godfrey, 156-157 Godfrey and Wooten II, 64 Small, 1282 Wunderlin, 268-269	pipevine woolly Dutchman's pipe	Aristolochiaceae; birthwort family	woody vine, high-climbing; lvs ovate, hairy, new growth densely and softly hairy; fls bent into Meerschaum pipe shape, yellowish with purple orifice; fruit a capsule; floodplain forests; Bay, Calhoun, Escambia, Gadsden, (Gulf), Holmes, Jackson, Liberty, Santa Rosa and Washington cos.; Apr.

SCIENTIFIC NAME	REFERENCES	COMMON NAMES	FAMILY	DESCRIPTIONS
20. <i>Asclepias curtissii</i> Gray Atlas; Taylor, p. 86	Long and Lakela, 710 Small, 1072-1073 Ward, 69 Wunderlin, 499-501	Curtiss' milk weed	Asclepiadaceae; milkweed family	lvs opposite, petiolate, 10+ mm wide; umbel stalks longer than the petioles; flrs greenish white, hoods narrowly lanceolate; dry hammocks, scrub, flatwoods; Brevard, Broward, Clay, Collier, (DeSoto), (Flagler), (Hardee), Hernando, Highlands, Hillsborough, Indian River, Lake, (Lee), Manatee, Marion, Martin, Orange, Osceola, Palm Beach, Pasco, Pinellas, Polk and (Putnam) cos.; May-Sep.
21. <i>Asimina tetramera</i> Small Federal Register, 26 Sep 1986 Atlas; Chafin; DPI poster, plate #55	Small, 531 Ward, 5-6 ^{OR} Wunderlin, 306	four-petal pawpaw scrub pawpaw	Annonaceae; custard-apple family	aromatic shrub to 3 m; lvs with leathery texture; flrs in axils of new leaves; 4 sepals; 2 whorls of petals with 3 each <u>OR</u> , 3 in one and the other with 4; outer petals maroon; scrub; Martin and Palm Beach cos.; May-Aug.
22. <i>Asplenium auritum</i> Swartz Atlas uses: <i>A. erosum</i> L. West Indies, Mexico, Central and South America	FNA, 236 Lakela and Long, 118-119 ^{OR} Long and Lakela, 95 Small: ferns, 160 Ward, 6-7 ^{OR} Wunderlin, 51-52	auricled spleen-wort eared spleenwort	Pteridophyta-- Polypodiaceae/ Aspleniaceae; spleenwort family	epiphytic fern; desiccated lvs. expand with water; lvs leathery, lf-let segments auricled at base, with incised margins, rachis green and winged; on trunks of large trees, mostly live oaks in mesic hammocks, strand swamp; Citrus, Dade, Collier, Hernando, Hillsborough, Pasco, Sumter and Volusia cos.
23. <i>Asplenium dentatum</i> L. [In the 1998 Rule, the name was <i>A. trichomanes-dentatum</i> L.] Flora North America uses: <i>A. trichomanes-dentatum</i> L. Chafin West Indies, Mexico, Central and South America	FNA, 237 Lakela and Long, 114-115 ^{OR} Small: ferns, 158-159 Wunderlin, 51-53	slender spleenwort	Pteridophyta-- Polypodiaceae/ Aspleniaceae; spleenwort family	fern; smallest of tropical spleenworts, to 20 cm long; tufted from non creeping rhizome; rachis dark only at the base, winged; segments asymmetrical, toothed margins; rockland hammocks, especially on rock walls in grottos; Broward, Dade and Palm Beach cos.
24. <i>Asplenium monanthes</i> L. AL, AZ, NC, SC, FL, West Indies, Mexico, Central and South America, Africa	FNA, 237-238 Lakela and Long, 115-116 ^{OR} Radford <i>et al.</i> , 32 Ward, xvii Wunderlin, 51-53	San Felasco spleenwort monosoral spleenwort single sorus spleenwort	Pteridophyta-- Polypodiaceae/ Aspleniaceae; spleenwort family	fern; fronds to 30 cm tall; 3-5 cm wide; rachis purplish; segments overlap; 1 sorus per lf-let, near the margin; cultivated; upland mixed forest, limestone near streams; Alachua Co. (extirpated?) and Jackson Co.
25. <i>Asplenium pumilum</i> Swartz West Indies, Mexico, Central and South America	FNA, 238-239 Lakela and Long, 124-125 ^{OR} Small: ferns, 175-176 ^{OR} Ward, 8 ^{OR} Wunderlin, 51-53	dwarf spleenwort triangle spleenwort hairy spleenwort chervil spleenwort	Pteridophyta-- Polypodiaceae/ Aspleniaceae; spleenwort family	fern; usually only a few cm tall; lvs compound, lvs triangular, hairy; shaded limestone boulders and ledges; Alachua, Citrus, Hernando, Marion and Volusia cos.
26. <i>Asplenium serratum</i> L. Chafin West Indies, Mexico, Central and South America	FNA, 235 Lakela and Long, 125-126 ^{OR} Small: ferns, 152-153 ^{OR} Ward, 9 Wunderlin, 51-53	bird's nest spleenwort American bird's nest fern wild bird's nest fern	Pteridophyta-- Polypodiaceae/ Aspleniaceae; spleenwort family	fern; roots with abundant matted hairs; vase-shaped rosette of lvs; lvs undivided, toothed; fallen logs in swamps and hammocks; Broward, Collier, Dade, Lee and Volusia cos.

SCIENTIFIC NAME	REFERENCES	COMMON NAMES	FAMILY	DESCRIPTIONS
27. <i>Asplenium verecundum</i> Chapm. ex L. Underw. Kartesz: <i>A. myriophyllum</i> (Sw.) C. Presl ❀ Chafin	Clewel, 47, as <i>A. myriophyllum</i> FNA, 244-245 Lakela and Long, 122-123❀ Small: ferns, 162-163❀ Wunderlin, 51-53 endemic	delicate spleenwort modest spleenwort	Pteridophyta-- Polypodiaceae/ Aspleniaceae; spleenwort family	fern; fronds to 30 cm long and 5 cm wide; segments alternate on rachis, each further divided into 1 to 5 parts; "lacy" appearance; spores uniform and normal; limestone in grottoes, on cliffs and boulders in shaded woods; Alachua, Citrus, Columbia, Dade, Gilchrist, Hernando, Jackson, Liberty, Marion, Orange, Sumter and Taylor cos.
28. <i>Aster hemisphericus</i> Alexander Wunderlin (1998) and Kartesz (1994): <i>A. paludosus</i> ssp. <i>hemisphericus</i> (Alexander) Cronq. Atlas: <i>Eurybia hemispherica</i> (Alexander) G.L. Nesom MO, KS, TX, AR, TN, LA, MS, AL, GA	Clewel, 293 Cronquist, 156, as <i>A. hemisphericus</i> Small, 1391 Wunderlin, 607-610	aster southern swamp aster	Compositae/ Asteraceae; daisy family tribe: Astereae.	basal and caudine lvs grass-like; head with subtending leaf-like bracts; peduncles stout, 2-10 cm long; upland mixed open woods, sandstone outcrops; Escambia and Washington cos.
29. <i>Aster spinulosus</i> Chapman Atlas: <i>Eurybia spinulosa</i> (Chapm.) G. L. Nesom ❀ Chafin	Clewel, 294 Cronquist, 157 Godfrey and Wooten II, 828 Small, 1392 Wunderlin, 607-610 endemic	pinewoods aster Apalachicola aster	Compositae/ Asteraceae; daisy family tribe: Astereae.	basal and caudine lvs grass-like, reduced upwards, lvs entire except sometimes remotely spinulose-toothed margins; peduncles up to 1 cm long, individual heads with 8-15 ray flrs; moist to dry pinelands and swamps; Bay, Calhoun, Franklin, Gulf and (Washington) cos.; Jul-Aug.
30. <i>Baccharis dioica</i> Vahl FL and West Indies	Correll and Correll, 1454-1456 Cronquist, 167 Long and Lakela, 850-851 Small, 1397-1398❀ Wunderlin, 611	broombush falsewillow, Vahl's baccharis, broom-bush, groundsel tree	Compositae/ Asteraceae; daisy family tribe: Astereae.	shrub, many branches, to 3 m tall; lvs spatulate-obovate, 2-4 cm long, 1-2 cm wide, entire, leathery, gland-dotted; staminate heads with about 20 flrs, pistilate heads ca. 50 flrs; pappus on achenes white, 8-14 mm long; hammocks, dune hollows; Dade Co.; fall. Extirpated?
31. <i>Baldwinia atropurpurea</i> Harper ❀ Chafin	Cronquist, 83 Godfrey and Wooten II, 801 Radford <i>et al.</i> , 1120 Small, 1455, as <i>Endormia atropurpurea</i> ❀ Wunderlin, 611 FL, GA, SC	purple baldwinia purpledisk honeycomb-head	Compositae/ Asteraceae; daisy family tribe: Helianthae.	herbaceous perennial; lower caudine lvs 7-30 cm long and to 1 cm wide [<i>B. uniflora</i> s to 10 cm long]; 2 to 4 heads per plant; disk flowers dark purple [<i>E. uniflora</i> s yellow], honey-comb-like receptacle, ray flowers yellow; pitcher plant bogs, moist pinelands, borders of shrub-tree bogs and bays; Clay, Nassau and Putnam cos.; fall.
32. <i>Baptisia megacarpa</i> Chapman ex Torrey and A. Gray AL, FL, GA	Clewel, 399 Isely, 114 Small, 677 Ward, 9-10❀ Wunderlin, 344-345	Apalachicola wild-indigo	Leguminosae/ Fabaceae; legume family-- Papilionoidae; pea subfamily	perennial herb to 1.5 m tall; lvs trifoliate, lf-lfts 4-8 cm long, glabrous; corollas cream-colored; racemes terminal, 2 to 15 flrs; legume pendent, inflated; moist soil, woodlands, ravine slopes, adjacent to streams; Bay, Gadsden, Holmes, Leon, Liberty and (Washington) cos.; May.
33. <i>Basiphyllaea corallicola</i> (Small) Ames ❀ Chafin	Correll and Correll, 340-341❀ Long and Lakela, 323 Luer, 228-230❀ Small, 393❀ Wunderlin, 227-232 FL, West Indies	Carter's orchid	Orchidaceae; orchid family	terrestrial; to 40 cm tall; fleshy corms; lvs 1 (occasionally 2), thin, to 12 cm long and 5 mm wide, sessile; infl with 3-10 flrs; flrs with greenish sepals and petals, con verging over the lip, shallow pockets in rock of pine rockland; Dade and Monroe [Keys only] cos.; winter, but blooms infrequently.

SCIENTIFIC NAME	REFERENCES	COMMON NAMES	FAMILY	DESCRIPTIONS
34. <i>Bigelowia nuttallii</i> L.C. Anderson Chafin FL, GA, AL, LA, TX	Clewel, 296 Cronquist, 136 Godfrey and Wooten II, 824-825 Wunderlin, 612	Nuttall's rayless goldenrod	Compositae/ Asteraceae; daisy family tribe: Astereae.	perennial herbs to 80 cm tall; colonial; lvs narrowly linear (1-2 mm wide); upland pine flatwoods, scrub, sandstone, seepage, stream banks; Pinellas (extirpated?) and Washington cos.; Jul-Nov.
35. <i>Blechnum occidentale</i> L. Atlas: <i>B. occidentale</i> L. var. <i>minor</i> Hook. FL, GA, LA, TX, West Indies, Central and South America	FNA, 225 Lakela and Long, 100-103 Small: ferns, 138-140 Ward, 10-11 Wunderlin, 58	sinkhole fern New World mid-sorus fern hammock fern	Pteridophyta-- Polypodiaceae/ Blechnaceae; chain fern family	fern; stolons; usually less than ½ m tall; compound, segments with entire (or minutely serrulate) margins; segments with long sorus along midrib; sinkholes in forests; Alachua, Citrus, Hernando and Pasco cos.
36. <i>Bonamia grandiflora</i> (A. Gray) Haller f. Endangered Species Act, 1973; Federal Register, 2 Nov 1987 as threatened. Atlas; Chafin; Taylor, p. 265 endemic	Small, 1080 Wunderlin, 304 Ward, 71-72 Wunderlin, 504-505	Florida bonamia Florida lady s nightcap	Convolvulaceae; morning-glory family	vine, does not twine or climb; lvs leathery, rounded at the base; sepals leathery, 2 cm long; corollas blue, funnel-form, 7-10 cm long; 2 stigmas; sandy soil, scrub; (Hardee), Highlands, Hillsborough, Lake, Manatee, Marion, Orange, Polk and Sarasota cos.; Apr-Sep.
37. <i>Bourreria cassiniifolia</i> (A. Rich.) Griseb. Chafin; Scurlock, p. 21 FL, West Indies	Long and Lakela, 727 Small, 1129 Wunderlin, 515-516	little strongback smooth strongback	Boraginaceae; borage family	shrub; alternate, lvs entire, 1-3 cm long, glabrous, petioles less than 5 mm long; white flrs; frt orange-red, 5-7 mm wide; pine rocklands; Dade and Monroe [Keys only] cos.; all year.
38. <i>Bourreria radula</i> (Poiret) G. Don Kartesz (1994) lists <i>B. succulenta</i> var. <i>revoluta</i> (Kunth) O.E. Schulz and <i>B. revoluta</i> Kunth as synonyms of <i>B. radula</i> . Wunderlin (1998) lists both <i>B. succulenta</i> and <i>B. radula</i> . Scurlock, p. 23 FL, West Indies	Long and Lakela, 727, as <i>B. succulenta</i> var. <i>revoluta</i> Small, 1129, as <i>B. revoluta</i> Wunderlin, 515-516	rough-strongback rough strongback	Boraginaceae; borage family	shrub or small tree; lvs entire but ciliate on margins, 3-7 cm long, rough pubescent, petioles more than 5 mm long; white flrs; frt orange-red, 9-14 mm wide; hammocks and pinelands; [Keys] Monroe Co.; all year.
39. <i>Bourreria succulenta</i> Jacq. A species complex: in some views, it includes <i>B. radula</i> ; or may be divided into ten species! [James S. Miller] Atlas FL, West Indies	Little and Wadsworth I, 466 Wunderlin, 515-516	pigeon-berry bodywood Bahama strongback	Boraginaceae; borage family	small tree or shrub; lvs 4-12.5 cm long, 1-7.5 cm wide, blunt or notched at tip, lower surface with fine hairs, upper surface glabrous; petioles .5- 1 cm long; flrs white; frts orange-red, ca. 1.5 cm wide; hammocks; Dade and Monroe [Keys only] cos.; all year.
40. <i>Brassia caudata</i> (L.) Lindl. FL, West Indies, Mexico, Central and South America	Long and Lakela, 335 Luer, 252-254 Small 396 Wunderlin, 227-232	spider orchid long-tailed brassia cricket orchid	Orchidaceae; orchid family	epiphyte; pseudobulbs flattened; lvs 2, to 30 cm long and 5 cm wide; infla raceme, to 15 flrs; flrs glossy yellowish with brownish splotches, petals and sepals long and slender (spidery), lip yellow with reddish-brown spots; rockland hammocks; Dade (extirpated?) and (Monroe) cos.; May-Jun.

SCIENTIFIC NAME	REFERENCES	COMMON NAMES	FAMILY	DESCRIPTIONS
292. <i>Platanthera integra</i> (Nutt.) A. Gray ex Beck synonym: <i>Habenaria integra</i> ✿✿Atlas NJ, DE south to FL and TX and north to TN	Clewell, 187 Godfrey and Wooten I, 640, 642✿✿ Luer, 144-145✿✿ Radford <i>et al.</i> , 337 Small, 373-374, as <i>Gymnadeniopsis</i> Wunderlin, 240-241	orange rein orchid yellow fringeless orchid frog-arrow	Orchidaceae; orchid family	terrestrial; to 60 cm tall; lvs sheath the stem, largest lowest, others reduced to become bracts; inflor terminal raceme with 40 to 60 flrs; flrs saffron yellow, lip not fringed (merely crenulate), nor 3-parted; swampy meadows, boggy depressions in wet woods; Calhoun, Duval, Escambia, Franklin, Gulf, Highlands, Jackson, Liberty, Nassau, Okaloosa, Orange, Osceola, Santa Rosa, Wakulla, Walton and Washington cos.; Jul-Sep.
293. <i>Pleopeltis astrolepis</i> (Liebm.) E. Fourn. FL, West Indies, Mexico, Central and South America	FNA, 325 Ward, 49-50, as <i>P. revoluta</i> ✿✿ Wunderlin, 46-47, as <i>P. revoluta</i> First found in FL 1977	star-scale fern star-scale polypody	Pteridophyta-- Polypodiaceae; polypody family	epiphytic fern; lv blades simple, to 20 cm long and 2 cm wide, weakly hygroscopic; lower surface scales scattered, less than 0.5 mm wide, deeply fringed and appear stellate; sori oval in single row on each side of midrib; in swamps on pond apple; Broward (and Palm Beach) cos. (ex tirpated?)
294. <i>Pleurothallis gelida</i> Lindl. ✿✿Chafin FL, West Indies, Mexico, Central and South America	Luer, 184-185✿✿ Small, 389 Wunderlin, 241	frosted orchid flor de llanten	Orchidaceae; orchid family	epiphyte; lv single, to 20 cm long, leathery, bright green, keeled; inflor a slender raceme with 5 to 25 flrs; flrs on down-arching pedicels, yellowish, coated with whitish pubescence (=frosted); on pop-ash, custard-apple and cypress in swamp hammocks; Collier and Lee cos.; Dec-Apr.
295. <i>Podophyllum peltatum</i> L. ✿✿Atlas Quebec to MN, south to TX and FL	Clewell, 253 Radford <i>et al.</i> , 470-471✿✿ Small, 544 Ward, 153 Wunderlin, 303	mayapple mandrake ground lemon umbrella-leaf	Berberidaceae; barberry family Podophyllaceae; mayapple family	herbaceous rhizomatous perennial; one lf when young, 2 lvs when older, peltate, orbicular, deeply lobed, to 34 cm broad; single flr to 5 cm wide, nodding, 6 sepals, 6-9 white petals; berry yellow, edible pulp, poisonous seeds and lvs; hammocks and bluffs; Jackson Co.; Mar-Apr.
296. <i>Poinsettia pinetorum</i> Small Kartesz: <i>Euphorbia pinetorum</i> (Small) G. L. Webster [See Taylor, 207-298; Bell and Taylor, 105-106, for other <i>Poinsettia</i> spp.] FL, West Indies	Long and Lakela, 545 Small, 803 Wunderlin, 406-407	Everglades poinsettia pineland spurge	Euphorbiaceae; spurge family	herb; to 1 m tall; lvs alternate, linear, less than 6 mm wide; upper blades red blotched near the base; sandy marshes, pine rocklands; Dade, Monroe and Palm Beach cos.
297. <i>Polygala lewtonii</i> Small Federal Register, 18 March 1993 ✿✿Chafin; Taylor, p. 254	Small, 770 Ward, 50-51 Wunderlin, 388-390	Lewton's polygala	Polygalaceae; milkwort family	perennial; up to 20 cm tall; lvs small; flrs of two kinds: normal up to 4 mm long, with 2 wing-like petaloid sepals purplish, pinkish-purple corolla s lower petal fringed and <u>cleistogamous</u> tiny, non-opening ones at the base of the plant; white sand, scrub vegetation; on Central Florida Ridge, Highlands, Lake, Marion, Orange, Osceola and Polk cos.; Feb-May.

SCIENTIFIC NAME	REFERENCES	COMMON NAMES	FAMILY	DESCRIPTIONS
298. <i>Polygala smallii</i> R.R.Sm. and Ward Endangered Species Act 1973; Federal Register, 18 July 1985 ✿✿Chafin endemic	Small, 773-773, as <i>P. arenicola</i> Ward, 51-528② Wunderlin, 388-391	tiny polygala	Polygalaceae; milkwort family	biennial; up to 4 cm tall; rosette of entire, spatulate lvs; flrs are grouped together in dense cluster, flrs are green to yellowish green (dry same color); lower petal is fringed; seed are 1.9-2.3 mm long; sandy pockets in pine rocklands, <i>Ceratiola</i> scrub, sandhills; Broward, Dade, Martin, Palm Beach and St. Lucie cos.; Mar-May.
299. <i>Polygonella basiramia</i> (Small) Nesom and Bates Federal Register, 21 Jan 1987 synonym: <i>Polygonella ciliata</i> Meisn. var. <i>basiramia</i> (Small) Horton. ✿✿Chafin; Taylor, p. 43 endemic	Small, 451 Wunderlin, 271	wireweed purple wireweed Florida jointweed	Polygonaceae; buckwheat family	annual or short-lived perennial; branches to form a cluster of 7 to 30 stems to 8/10 m tall; hairlike lvs; tips of branches with clusters of small white flrs; white sand in sand pine and rosemary scrub of Lake Wales Ridge and Avon Park AF Range; Highlands and Polk cos.; Sep-Oct.
300. <i>Polygonella myriophylla</i> (Small) Horton Federal Register, 27 April 1993 ✿✿Atlas; Chafin endemic	Small, 450 Wunderlin, 271-272	sand lace woody wireweed Small's jointweed	Polygonaceae; buckwheat family	shrub, much branched; prostrate; lvs persistent; stigma and style 0.5-0.8 mm long; scrub; Highlands, Orange, Osceola and Polk cos.; Apr-Nov.
301. <i>Polygonum meisnerianum</i> Cham. and Schlecht. Fl specimens belong to var. <i>beyrichianum</i> (C. and S.) Meisn. FL, SC, LA, West Indies, Mexico, Central and South America	Clewel, 456 Godfrey and Wooten II, 76, 78② Ward, 153-154② Wunderlin, 273-274	Mexican tear-thumb branched tear-thumb	Polygonaceae; buckwheat family	herbaceous perennial; about ½ m tall, but reclines and roots, stem with ribs bearing hooks or barbs which will rip; lvs alternate, with eared, sessile bases, flrs white or pinkish; floodplain forest, shallow water at edge of lakes; Alachua, Jefferson and Leon cos.; Jun-Oct.
302. <i>Polymnia laevigata</i> Beadle ✿✿Atlas TN, MO, AL, GA, FL	Clewel, 321 Cronquist, 75-76 Small, 1407 Wunderlin, 643	Tennessee leaf-cup	Compositae/ Asteraceae; daisy family tribe: Heliantheae.	perennial herb; stem glabrous; lvs opposite, to 30 cm long; single series of involucral bracts; disks to 13 mm wide; achenes 4-6 ribbed and angled; calcareous hammocks; Jackson Co.; May.
303. <i>Polypodium dispersum</i> A.M. Evans [In 1998 Rule, listed as: <i>Pecluma dispersa</i> (A.M. Evans) M.G. Price] ✿✿Chaffin, West Indies, Mexico, Central and South America to Brazil	FNA, 314-315, as <i>Pecluma</i> Long and Lakela, 80-82 Wunderlin, 46, as <i>Pecluma</i>	widespread polypody	Pteridophyta Polypodiaceae; polypody family	fern; epiphytic or on rocks; short-creeping stems; petiole scales deltoid to linear; lvs to 70 cm long, without peltate scales, narrowly ovate, pectinate, segments at base of blade abruptly reduced and reflexed; sori round or oval, sporangia with 32 spores; hammocks; Alachua, Brevard, Citrus, Dade (extirpated?) Hernando, Hillsborough, Marion, Martin, Monroe [incl. Keys] (extirpated?), Pasco, Sumter and Volusia cos.; spores all year.

SCIENTIFIC NAME	REFERENCES	COMMON NAMES	FAMILY	DESCRIPTIONS
304. <i>Polypodium plumula</i> Humb. and Bonpl. ex Willd. [In 1998 Rule, listed as <i>Pecluma plumula</i> (Kunth) M.G. Price] FL, West Indies, Mexico, Central and South America to Brazil	FNA, 314, as <i>Pecluma</i> Long and Lakela, 80 Small: fern, 73-75♂♂♂ Wunderlin, 46, as <i>Pecluma</i>	plume polypody	Pteridophyta Polypodiaceae; polypody family	fern; epiphytic or on rocks; short-creeping stems; petiole scales ovate to cordate, inflated; lvs to 50 cm long, lacks peltate scales, linear-elliptic, segments linear, segments at base of blade abruptly reduced, but not deflexed; sori round, sporangia with 54 spored; hammocks; Brevard, Citrus, Dade, (DeSoto), Duval, Flagler, Hardee, Hernando, Hillsborough, Lake, Marion, Martin, Monroe [not Keys], Orange, Pasco, Polk, Seminole, St. Johns, Sumter and Volusia cos.; spores all year.
305. <i>Polypodium ptilodon</i> Kunze [In 1998 Rule, listed as <i>Pecluma ptilodon</i> (Kunze) M.G. Price] US ones: <i>P. ptilodon</i> var. <i>caespitosum</i> (Jenman) Lellinger synonym: <i>Polypodium pectinatum</i> L. FL, West Indies, Mexico, Central America	FNA, 314 Long and Lakela, 80 Small: ferns, 75-77♂♂♂ Wunderlin, 46	swamp plume polypody	Pteridophyta-- Polypodiaceae; polypody family	fern; epiphytic or on rocks; short-creeping stems; petiole scales threadlike to absent; lvs to 90 cm long, without peltate scales, lanceolate, segments lanceolate, segments at base of blade reduced to "ears"; sori with dense hairs around them, sporangia with 64 spores; hammocks, swamps; Brevard, Broward, Citrus, Collier, Dade, Duval, Hardee, Hernando, Highlands, Hillsborough, Lake, Manatee, Marion, Martin, Orange, Osceola, Pasco, Pinellas, Polk, Putnam, Seminole, Sumter and Volusia cos.; spores all year.
306. <i>Polyrrhiza lindenii</i> (Lindl.) Cogn. in Urban [In the 1998 rule, listed as <i>Polyradicion lindenii</i> (Lindl.) Garay] FL, West Indies	Long and Lakela, 328 Luer, 277-279♂♂♂ Small, 398-399 Wunderlin, 241, as <i>Polyradicion</i>	ghost orchid palm Polly white butterfly orchid albino frog orchid	Orchidaceae; orchid family	epiphyte; nearly stemless; leafless; roots extensive, with chlorophyll; flrs white with two long "tails"; on shrubs and trees in maritime hammocks, river swamps and wet forests; Collier, Dade (extirpated?), Hendry, Lee, and Monroe [not Keys] cos.; May-Sep.
307. <i>Polystachya concreta</i> (Jacq.) Garay and Sweet synonyms: <i>P. flavescens</i> (Lindl.) J.J. Smith; <i>P. luteola</i> (Sw.) Hook. FL, West Indies, Mexico, Central and South America, Africa, Asia	Correll and Correll, 386-387♂♂♂ Long and Lakela, 328, as <i>P. extinctoria</i> Luer, 221-223♂♂♂ Small, 393, as <i>P. minuta</i> Wunderlin, 241	pale-flowered polystachya greater yellowspike orchid	Orchidaceae; orchid family	epiphyte; to 56 cm tall; lvs sheathed, keeled, to 32 cm long and 3 cm wide, white margins; inflor terminal, branched, to 60 flrs; flrs not resupinate, glossy, yellow to greenish-yellow, appear hooded due to the curved lateral sepals; strand swamps; Broward, Collier, Dade, DeSoto, Hardee, Highlands, Lee, Martin and Monroe [Keys only] cos.; all year.
308. <i>Ponthieva brittoniae</i> Ames synonym: <i>Ponthieva racemosa</i> (Walter) Mohr var. <i>brittoniae</i> (Ames) Luer FL, West Indies	Correll and Correll, 388-390♂♂♂ Long and Lakela, 314 Luer, 82, 87♂♂♂ Small, 380 Wunderlin, 242	Mrs. Britton's shadow-witch orchid Britton's shadowwitch	Orchidaceae; orchid family	terrestrial; to 30 cm tall; lvs in basal rosette, 3 to 5, to 8 cm long and 3 cm wide, not present when flowering; inflor a terminal raceme with up to 20 flrs; flrs not resupinate, greenish-white, petals longer than wide, (lacks the green veining of <i>P. racemosa</i>), lateral sepals cocked acutely upwards ("hands-over-head effect"); pine rocklands; Collier, Dade and Sarasota cos.; Dec-Feb.

SCIENTIFIC NAME	REFERENCES	COMMON NAMES	FAMILY	DESCRIPTIONS
309. <i>Potamogeton floridanus</i> Small ✿✿Chafin endemic	Clewel, 191 Small, 16 Wunderlin, 66	Florida pondweed	Potamogetonaceae; pond weed family	herb growing in water; lvs alternate, free from stipules; floating lvs narrowly elliptic, 4-7 cm long; submerged lvs lack blades, less than 3 mm wide; flowering spikes 1-2 cm long; Blackwater River; Santa Rosa Co.
310. <i>Prescotia oligantha</i> (Sw.) Lindl. FL, West Indies, Mexico, Central and South America	Correll and Correll, 390, 349✿○ Long and Lakela, 314 Luer, 84, 87✿✉ Small, 379 Wunderlin, 242	small-flowered orchid	Orchidaceae; orchid family	terrestrial; to 30 cm tall; roots thick and fleshy; lvs 1 to 3, basal, to 7 cm long and 4 cm wide, small bracts on stem; inflor terminal raceme with up to 50 flrs; flrs not resupinate, ca. 1 mm, drab until viewed with magnification, white or pinkish; rockland hammocks; Dade and Lee cos.; Feb.
311. <i>Prunus geniculata</i> Harper Federal Register, 21 Jan 1987 ✿✿Atlas; Chafin; Taylor, p. 55 endemic	Small, 649 Ward, 53-54✿○ Wunderlin, 330	scrub plum	Rosaceae; rose family	shrub; densely branched, zig zag twigs with stout spine tips; lvs to 1.5 cm long, fine teeth; flrs on spur shoots, rose- red calyx, white petals, 3 mm long; frts 2 cm wide plums; sand pine scrub of Central Florida Ridge; Highlands, Lake Orange and Polk cos.; Feb-Mar.
312. <i>Pseudophoenix sargentii</i> Wendl. ex Sarg. ✿✿Chafin; Scurlock, p. 130 FL, West Indies, Central America	Correll and Correll, 257 Long and Lakela, 242 Small, 238 Ward, 54-55 Wunderlin, 181	buccaneer palm Sargent's cherry palm hog palm datelet dummy-date hog cabbage palm	Palmae/ Arecaceae; palm family	tree; to 8 m tall; trunk gray-green with conspicuous rings; lvs to 3 m long, lflets v-shaped at base and up to ½ m long, with threads dangling from the margins; frts bright red, 2 cm wide; rocklands hammocks near sea level on limestone or sand where protected from wind; Dade and Monroe [Keys only] cos.
313. <i>Psychotria ligustrifolia</i> (Northrup) Millsp. ✿✿Atlas; Chafin; Scurlock, p. 133 FL, West Indies	Correll and Correll, 1411- 1412 Long and Lakela, 799-800 Small, 1261, as <i>P. bahamensis</i> Wunderlin, 581	Bahama wild coffee smooth wild coffee	Rubiaceae; madder family	shrub, to 2 m tall, smooth stems; lvs opposite, to 12 cm long, lanceolate to oblanceolate, acuminate tips; axillary cymes or panicles; sepals with deltoid lobes; petals united into 4 mm long tube, white; drupe red, 5 mm long; hammocks, pineland; Dade Co. and Monroe Co. [Keys only]; spring.
314. <i>Remirea maritima</i> Aubl. synonym: <i>Cyperus pedunculatus</i> (R. Br.) J. Kern. ✿✿Atlas FL, West Indies, Old World	Godfrey and Wooten I, 400 Long and Lakela, 226 Small, 187-188 Ward, 55-56✿○ Wunderlin, 159, as <i>Cyperus</i>	beach-star juncos de playa	Cyperaceae; sedge family	perennial herb; creeping rhizome rooting at joints and with stems arising also; lvs numerous, crowded; flrs inconspicuous; coastal dunes; Broward, Dade, Indian River, Martin, Palm Beach and (St. Lucie) cos.; Jul-Nov.
315. <i>Rhexia parviflora</i> Chapman endemic	Clewel, 431 Godfrey and Wooten II, 364, 366✿○ Small, 927 Wunderlin, 457	Apalachicola meadow beauty	Melastomataceae; melastoma family	herbs; stem not hairless; lvs opposite; flrs with urn-shaped base, white petals; 8 stamens, anthers 5-11 mm long, curved; margins of open cypress swamps, with <i>Hypericum</i> ; Bay, Calhoun, Franklin, Gulf, Liberty, Okaloosa, Santa Rosa and Walton cos.; Jun-Aug.

SCIENTIFIC NAME	REFERENCES	COMMON NAMES	FAMILY	DESCRIPTIONS
316. <i>Rhipsalis baccifera</i> (J. Miller) Stearn ⊗ Chafin FL, West Indies, Mexico, Central and South America, tropical Africa, Sri Lanka	Long and Lakela, 627 Small, 913 Wunderlin, 448	mistletoe cactus pencil cactus	Cactaceae; cactus family	epiphytes; stems round, forms dense masses 1 m or more long; fleshy, pale green; flrs solitary, white; frts white or pink; on mangroves and button wood in tidal swamps; Dade, Monroe [not Keys] (extirpated?), Seminole (escaped) cos.
317. <i>Rhododendron alabamense</i> Rehder (Hybridizes with <i>R. canescens</i>) ⊗ Atlas, Chafin	Clewel, 531 Godfrey, 260-262⊗ Small, 996 Wunderlin, 478	Alabama azalea	Ericaceae; heath family	shrub, stoloniferous, to 4 m tall; lvs emerge before flrs, lvs not lepidote; flrs white with yellow blotch, lemon scented, narrow tube, calyx with sticky glands; stamens 5; hammocks; Jefferson and Leon cos. Apr.
318. <i>Rhododendron austrinum</i> (Small) Rehder ⊗ Atlas; Chafin; DPI poster, plate #34 Taylor, p. 307	Clewel, 351 Godfrey, 262-264⊗ Small, 995 Ward, 106-107⊗ Wunderlin, 478	Florida flame azalea orange azalea	Ericaceae; heath family	shrub, not stoloniferous; lvs emerge after the flrs, lvs with soft hairs beneath; flrs yellow to orange, red, or orange-red, fragrant, tube glandular; 5 stamens; winter buds hairy; forested bluffs, hammocks, floodplains; Baker, Calhoun, Escambia, Franklin, Gadsden, Holmes, Jackson, Liberty, Okaloosa, Santa Rosa, Walton and Washington cos.; Mar-Apr.
319. <i>Rhododendron chapmanii</i> Gray Federal Register, 24 Apr 1979 Godfrey and Wunderlin use <i>R. minus</i> (Michaux) var. <i>chapmanii</i> (Gray) Duncan and Pullen. ⊗ Atlas; Bell and Taylor, p. 85; Chafin; DPI poster, plate #24	Clewel, 351 Godfrey, 265-267⊗ Godfrey and Wooten II, 473 Small, 998 Ward, 57-58⊗ Wunderlin, 478	Chapman's rhododendron rose-bay	Ericaceae; heath family	shrub, evergreen; to 2 m tall; lvs oval, entire margins, scurfy-dotted; flrs in terminal clusters, rose pink, ca. 3 cm long; 10 stamens; pine flatwoods and borders of titi swamps; Clay, Gadsden, Franklin, Gulf, Leon and Liberty cos.; Mar-Apr.
320. <i>Rhus michauxii</i> Sargent Federal Register, 28 Sept 1989 [probably not extant in FL] [See Taylor, 149; Bell and Taylor, 131, for <i>R. copallina</i> .]	Radford <i>et al.</i> , 678 Recovery Plan (1993) Wunderlin, 410	Michaux's sumac false poison sumac	Anacardiaceae; cashew family	shrub; rhizomatous, to 1 m tall; entire plant densely pubescent; lvs cd, 9 to 13 sessile lflets which are evenly serrate; flrs greenish-yellow in terminal cluster, dioecious plants; frts red; sandy or rocky open woods on acidic soils; Alachua Co.; June; frts Aug-Sep. Extirpated?
321. <i>Rhynchosia swartzii</i> (Vail) Urban ⊗ Chafin	Correll and Correll, 686 Isely, 105 Long and Lakela, 473-474 Small, 713, as <i>Dolicholus</i> Wunderlin, 370	Swartz snoutbean bonaney-bean	Leguminosae/ Fabaceae; legume family Papilionoideae; pea subfamily	woody vine, twining; lvs trifoliate, lflets to 6 cm long, terminal one largest; racemes shorter than petioles (to 2 cm); calyx to 3 mm long; corolla yellow, standard 8 mm long, resin dotted; legume curved, to 3 cm long, 7 mm wide; seeds bright red; hammock s; Dade and Monroe [Keys only] cos.
322. <i>Rhynchospora crinipes</i> Gale [See Taylor, 28-29, for other <i>Rhynchospora</i> spp.]	Rhodora 46:132, 173-174 Godfrey and Wooten I, 385, includes in <i>R. filifolia</i> Wunderlin, 172	hairy peduncled beakrush mosquito beaksedge Alabama beakrush	Cyperaceae; sedge family	herb, clumped, languid habit; basal lvs 2 mm wide; stems to 7.5 cm tall; differs from <i>R. filifolia</i> by the achene stipe (stalk): 0.6 mm long, persistent, clothed with tangle of white, ascending hairs; roadsides, ditches, pond borders; Bay, Gulf, Liberty, Okaloosa and Santa Rosa cos.

SCIENTIFIC NAME	REFERENCES	COMMON NAMES	FAMILY	DESCRIPTIONS
323. <i>Ribes echinellum</i> (Coville) Rehder Federal Register, threatened, 18 July 1985 ✿Atlas; Chafin	Clewel, 481 Godfrey, 649-650✿ Radford <i>et al.</i> , 520-521✿ Small, 603 Ward, 58-59✿ Wunderlin, 324 FL and McCormick Co., SC	Miccosukee gooseberry Florida gooseberry South Carolina gooseberry McCormick gooseberry	Grossulariaceae; currant family Or, Saxifragaceae; saxifrage family	shrub; branches root at tips; stem with sharp spines about 1 cm long, lvs with lobes (like a sugar-maple), with long petiole, lvs shed in summer, emerge in fall and overwinter; flrs single in lf axils, with long stalks: stamens 1 cm longer than petals; long hairs on floral tube become spines in fruits; Gadsden and Jefferson (on shore of Lake Miccosukee) cos.; Mar.
324. <i>Roystonea elata</i> (Bartram) F. Harper Zona (1997): <i>R. regia</i> (Kunth) O.F. Cook [See Taxon 45:671-681], Harvard Papers in Botany Vol 2 (1): 71-107. ✿Bell and Taylor, p. 43; Chafin; DPI poster, plate #4; Scurlock, p. 142ndemic	Long and Lakela, 242 Small, 238 Ward, 155-156 Wunderlin, 181, as <i>R. regia</i>	Florida royal palm	Palmae/ Arecaceae; palm family	tree; columnar trunk to 40 m tall, with bright green column at top composed of sheathing lf bases (only sheath of oldest leaf is visible, since it encircles the others); lvs feather-like, to 9 m long, recurved crosswise; cultivated; rockland hammocks, shell middens, strand swamp; Collier, Dade, (Monroe) and Palm Beach cos.
325. <i>Rudbeckia nitida</i> Nuttall [var. <i>nitida</i>] ✿Atlas; Chafin	Clewel, 323 Cronquist, 27 Godfrey and Wooten II, 756 Wunderlin, 645-646 FL to TX	St John's Susan shiny coneflower	Compositae/ Asteraceae; daisy family tribe: Helianthae.	perennial, fibrous-roots, to 1.3 m tall; stems and lvs hairless; lvs unlobed, midstem lvs 8-15 cm long, veins conspicuous; discs florets light reddish-brown, rays yellow, drooping, about 2.5 cm long; moist flatwoods, prairies, roadside ditches; Baker, Bay, Clay, Gulf, Manatee, Marion and St. Johns cos.; May-Jul.
326. <i>Rudbeckia triloba</i> L. Ours are var. <i>pinnatiflora</i> Torr. and A. Gray species: CT to MI, IO, NB s to FL and TX var. <i>pinnatiflora</i> : NC, FL	Clewel, 323 Cronquist, 25-26 Radford <i>et al.</i> , 1108-1109 Small, 1426, as <i>R. pinnatiflora</i> Wunderlin, 646	brown-eyed Susan	Compositae/ Asteraceae; daisy family tribe: Helianthae.	short lived perennial, to 1.5 m tall; stems and lvs hairy; some lvs divided almost to the midrib, to 5 cm long; discs florets darkpurple, disk hemispheric or ovoid, 1-1.5 cm wide; rays yellow but may be orange toward base, 1-2 cm long (rarely to 2.5); disturbed sites with calcareous soil; Jackson and Levy cos.; May-Sept.
327. <i>Ruellia noctiflora</i> (Nees) A. Gray ✿Atlas; Chafin	Clewel, 239 Godfrey and Wooten II, 708 Small, 1229 Ward, 107-108 Wunderlin, 571-572 FL, GA to MS	night-flowering ruellia night-blooming wild-petunia	Acanthaceae; acanthus family	herb; to 30 cm tall; hairy; lvs to 7 cm long; corolla blue or white, to 8 cm long; capsule to 22 mm long; wet flatwoods, seepage slopes; Clay, Duval, Franklin, Gulf, Jackson, (Lee), Liberty, Nassau, St. Johns and Wakulla cos.; May-Aug.
328. <i>Salix eriocephala</i> Michaux ✿Atlas mostly a northern species, it is disjunct in S GA, S AL and FL AL, GA, FL	Argus, 128-134 Clewel, 477, as <i>S. rigida</i> Godfrey, 624-625✿ Small, 414, as <i>Salix cordata</i> Wunderlin, 252	heart-leaved willow	Salicaceae; willow family	shrub; to 6 m tall; branches reddish brown; lvs up to 13 cm X 3.6 cm, base heart-shaped, tips acute; river and stream banks, marshy fields and mixed wet woods; Gadsden, Jackson and Leon cos.; Mar-Apr.

6. <i>Rhipidophyllum hystrix</i> (Pursh) Wendl. and Drude SC, GA, AL, MS, FL	Clewell, 189 Godfrey, 78-80♂♂ Small, 243♂♂ Wunderlin, 181	needle palm blue-palmetto vegetable porcupine	Palmae/ Arecaceae; palm family	Underground stems; lvs palmate, silvery below, petioles with long slender needles; fruits cluster amid the petioles and needles; river bluffs, ravine slopes, hammocks, bottomlands; Escambia to Volusia, south to Highlands and Manatee cos.
7. <i>Rhododendron canescens</i> (Michaux) Sweet ♂♂Bell and Taylor, p. 84; Taylor, p. 227 DE, MD, south to FL, west to TX, OK, AR, TN	Clewell 351, Godfrey 264-265♂♂ Radford <i>et al.</i> , 799-800 Small, 995 Wunderlin, 478	pink azalea southern pinxterbloom Piedmont azalea bush honeysuckle hoary azalea	Ericaceae; heath family	Shrub to 5 m tall; lvs deciduous, 4-10 cm long, soft pubescent beneath; fls appear before (or with) new leaves, fragrant, hairy, corollas 2.5-4.5 cm long, pink to whitish, 5 stamens about 3 times longer than the tubes; wet to well-drained woodlands with acidic soil; Escambia to Duval, Alachua and Marion cos.; spring.
8. all native species of <i>Zamia</i> [= <i>Zamia pumila</i> L.] ♂♂Bell and Taylor, p. 6 2 counties in GA, FL, West Indies	Clewell, 54 Correll and Correll, 58-60♂♂ Godfrey, 66-68♂♂ Long and Lakela, 108-110 Small, 1-2♂♂ Wunderlin, 61	coontie wild sago FL-arrowroot contis compties comfort-root Bay-rush	Gymnospermae-- Cycadopsida: Zamiaceae; cycad family	Separate ♀♀ and ♂♂ plants; stem underground; lvs evergreen, pinnately cpd, circinate in bud, leathery and stiff; ♀♀ cones 6-10 cm (sometimes to 20 cm) tall, scale faces 1-3 cm wide, 2 orange or red seeds per scale; well-drained sandy or loamy soils; Dade, Monroe, north to Dixie, Suwannee and St. Johns cos.

iv. Family Affiliation of species on the REGULATED PLANT INDEX of September 2000.

LICHENS:

1 endangered: *Cladonia perforata*

PTERIDOPHYTA:

45 endangered: *Adiantum melanoleucum*, *Adiantum tenerum*, *Anemia wrightii*, *Asplenium auritum*, *Asplenium monanthes*, *Asplenium pumilum*, *Asplenium serratum*, *Asplenium trichomanes-dentatum*, *Asplenium verecundum*, *Blechnum occidentale*, *Campyloneurum angustifolium* *Campyloneurum costatum*, *Campyloneurum latum*, *Cheilanthes microphylla*, *Ctenitis sloanei*, *Ctenitis submarginalis*, *Dennstaedtia bipinnata*, *Isoetes engelmannii*, *Lomariopsis kunzeana*, *Lycopodium dichotomum*, *Microgramma heterophylla*, *Neuroodium lanceolatum*, *Ophioglossum palmatum*, *Pecluma dispersa*, *Pecluma plumula*, *Pecluma ptilodon*, *Pellaea atropurpurea*, *Pleopeltis astrolepis*, *Schizaea germanii*, *Selaginella eatonii*, *Sphenomeris clavata*, *Tectaria coriandrifolia*, *Tectaria fimbriata*, *Thelypteris grandis*, *Thelypteris patens*, *Thelypteris reptans*, *Thelypteris reticulata*, *Thelypteris sclerophylla*, *Thelypteris serrata*, *Trichomanes holopterum*, *Trichomanes krausii*, *Trichomanes lineolatum*, *Trichomanes punctatum*;
6 threatened: *Acrostichum aureum*, *Athyrium filix-femina*, *Nephrolepis biserrata*, *Pteris bahamensis*, *Tectaria heracleifolia*, *Thelypteris augescens*;
3 commercially-exploited: *Lycopodium cernuum*, *Osmunda cinnamomea*, *Osmunda regalis*.

GYMNOSPERMAE:

TAXACEAE:

2 endangered: *Taxus floridana*, *Torreya taxifolia*.

ZAMIACEAE:

1 commercially-exploited: all native species of *Zamia* (coontie).

ANGIOSPERMAE:

ACANTHACEAE:

3 endangered: *Justicia cooleyi*, *Justicia crassifolia*, *Ruellia noctiflora*.

AGAVACEAE: see DRACAENACEAE. (Sometimes placed in Liliaceae.)

AMARANTHACEAE:

1 endangered: *Celosia nitida*.

AMARYLLIDACEAE: (Sometimes placed in Liliaceae.)

2 endangered: *Hymenocallis godfreyi*, *Hymenocallis henryae*;
3 threatened: *Zephyranthes atamasco*, *Z. simpsonii*, *Z. treatiae*.

ANACARDIACEAE:

1 endangered: *Rhus michauxii*.

ANNONACEAE:

3 endangered: *Asimina tetramera*, *Deeringothamnus pulchellus*, *Deeringothamnus rugelii*.

APIACEAE: see UMBELLIFERAEE

APOCYNACEAE:

1 endangered: *Vallesia antillana*;
1 threatened: *Angadenia berteroii*.

AQUIFOLIACEAE:

2 threatened: *Ilex amelanchier*, *Ilex krugiana*.

ARECACEAE: See PALMAE

ARISTOLOCHIACEAE:

2 endangered: *Aristolochia pentandra*, *Aristolochia tomentosa*;
1 threatened: *Hexastylis arifolia*.

ASCLEPIADACEAE:

6 endangered: *Asclepias curtissii*, *Matelea alabamensis*,
Matelea baldwyniana, *Matelea flavidula*, *Matelea floridana*, *Matelea pubiflora*;
3 threatened: *Asclepias viridula*, *Cynanchum blodgettii*,
Matelea gonocarpos.

ASTERACEAE: See COMPOSITAE

BORAGINACEAE:

8 endangered: *Bourreria cassinifolia*, *Bourreria radula*,
Bourreria succulenta, *Cordia globosa*, *Cynoglossum virginianum*, *Heliotropium fruticosum*, *Tournefortia gnaphalodes*, *Tournefortia hirsutissima*.

BRASSICACEAE: see CRUCIFERAEE

BROMELIACEAE:

7 endangered: *Catopsis berteroiana*, *Catopsis floribunda*,
Catopsis nutans, *Guzmania monostachia*, *Tillandsia fasciculata*, *Tillandsia pruinosa*, *Tillandsia utriculata*;
3 threatened: *Tillandsia balbisiana*, *Tillandsia flexuosa*,
Tillandsia valenzuelana.

BURMANNIACEAE:

1 endangered: *Burmannia flava*.

BUXACEAE:

1 endangered: *Pachysandra procumbens*.

CACTACEAE:

7 endangered: *Cereus eriophorus*, *Cereus gracilis*, *Cereus robinii*, *Opuntia spinosissima*, *Opuntia triacantha*, *Pilosocereus bahamensis*, *Rhipsalis baccifera*;
2 threatened: *Cereus pentagonus*, *Opuntia stricta*.

CAESALPINACEAE: See LEGUMINOSAE

CALYCANTHACEAE:

1 endangered: *Calycanthus floridus*.

CAMPANULACEAE: (Sometimes in Lobeliaceae.)

1 endangered: *Campanula robbinsiae*;
1 threatened: *Lobelia cardinalis*.

CANELLACEAE:

1 endangered: *Canella winterana*.

CARYOPHYLLACEAE:

4 endangered: *Minuartia godfreyi*, *Paronychia chartacea*,
Silene polypetala, *Silene virginica*.

CELASTRACEAE:

3 endangered: *Euonymus atropurpurea*, *Gyminda latifolia*,
Schaefferia frutescens;
3 threatened: *Crossopetalum illicifolium*; *Crossopetalum rhacoma*, *Maytenus phyllanthoides*.

CISTACEAE:

2 endangered: *Lechea divaricata*, *Lechea lakelae*;
1 threatened: *Lechea cernua*.

CLUSIACEAE: see GUTTIFERAE.

COLCHICACEAE:

1 endangered: *Uvularia floridana*. Often placed in
 LILIACEAE, or UVULARIACEAE.

COMPOSITAE:

25 endangered: *Ageratum littorale*, *Aster hemisphericus*, *Aster spinulosus*, *Baccharis dioica*, *Baldwina atropurpurea*, *Bigelowia nuttallii*, *Brickellia cordifolia*, *Brickellia mosieri*, *Chrysopsis cruiseana*, *Chrysopsis floridana*, *Chrysopsis godfreyi*, *Coreopsis integrifolia*, *Echinacea purpurea*, *Eupatorium frustratum*,

Hasteola robertiorum, *Helianthus carnosus*,
Koanophyllum villosum, *Liatris ohlingerae*, *Liatris provincialis*, *Marshallia obovata*, *Marshallia ramosa*, *Pityopsis flexuosa*, *Polynnia laevigata*, *Rudbeckia nitida*, *Vernonia blodgettii*;

8 threatened: *Cacalia diversifolia*, *Chaptalia albicans*, *Garberia heterophylla*, *Hartwrightia floridana*, *Melanthera parvifolia*, *Phoebeanthus tenuifolius*, *Sachsia bahamensis*, *Verbesina chapmanii*.

CONVALLARIACEAE:

1 endangered: *Medeola virginiana*. Often placed in
 LILIACEAE.

CONVOLVULACEAE:

10 endangered: *Bonamia grandiflora*, *Calystegia catesbeiana*, *Evolvulus convolvuloides*, *Evolvulus grisebachii*, *Ipomoea microdactyla*, *Ipomoea tenuissima*, *Jacquemontia havanensis*, *Jacquemontia pentanthes*, *Jacquemontia reclinata*, *Stylisma abdita*;
1 threatened: *Jacquemontia curtissii*.

CORNACEAE:

1 endangered: *Cornus alternifolia*.

CROOMIACEAE:

1 endangered: *Croomia paucifolia*.

CRUCIFERAE:

3 endangered: *Arabis canadensis*, *Warea amplexifolia*, *Warea carteri*.

CUCURBITACEAE:

1 endangered: *Cucurbita okeechobeensis*.

CYPERACEAE:

8 endangered: *Carex chapmanii*, *Carex microdonta*, *Cyperus flavidus*, *Cyperus fuligineus*, *Eleocharis rostellata*, *Remirea maritima*, *Rhynchospora crinipes*, *Scleria lithosperma*;
2 threatened: *Carex baltzellii*, *Rhynchospora stenophylla*.

DRACAENACEAE: Often placed in AGAVACEAE.

1 endangered: *Nolina brittoniana*
1 threatened: *Nolina atopocarpa*.

DROSERACEAE:

1 endangered: *Drosera filiformis*;
1 threatened: *Drosera intermedia*.

ERICACEAE:

4 endangered: *Epigaea repens*, *Monotropa hypopithys*,
Monotropsis reynoldsiae, *Rhododendron alabamense*,
Rhododendron austrinum,
Rhododendron chapmanii;

1 threatened: *Kalmia latifolia*;
1 commercially-exploited: *Rhododendron canescens*.

ERIOCAULACEAE:

1 endangered: *Eriocaulon nigrobracteatum*.
1 threatened: *Lachnocaulon digynum*.

EUPHORBIACEAE:

13 endangered: *Argythamnia blodgettii*, *Chamaesyce cumulicola*, ***Chamaesyce deltoidea***, ***Chamaesyce garberi***, *Chamaesyce porteriana*, *Croton humilis*, *Drypetes diversifolia*, *Euphorbia commutata*, ***Euphorbia telephiooides***, *Hippomane mancinella*, *Phyllanthus leibmannianus*, *Poinsettia pinetorum*, *Savia bahamensis*;
3 threatened: *Chamaesyce pergamenta*, *Drypetes lateriflora*, *Tragia saxicola*.

FABACEAE: see LEGUMINOSAE

FAGACEAE:

1 threatened: *Quercus arkansana*.

GENTIANACEAE:

2 endangered: *Gentiana pennelliana*, *Leiphaimos parasitica*.

GOODENIACEAE:

1 threatened: *Scaevola plumieri*.

GRAMINEAE:

9 endangered: *Aristida simpliciflora*, *Cenchrus brownii*, *Ctenium floridanum*, *Digitaria pauciflora*, *Eragrostis tracyi*, *Panicum abscissum*, *Schizachyrium niveum*, *Schizachyrium sericatum*, *Setaria chapmanii*;
6 threatened: *Andropogon arctatus*, *Calamovilfa curtissii*, *Coelorachis tuberculosa*, *Digitaria dolichophylla*,

Panicum nudicaule, *Tripsacum floridanum*.

GROSSULARIACEAE:

1 endangered: *Ribes echinellum*.

GUTTIFERAE:

3 endangered: *Hypericum cumulicola*, *Hypericum edisonianum*, *Hypericum lissophloeus*.

HYDRANGEACEAE:

1 endangered: *Hydrangea arborescens*.

HYPERICACEAE: see GUTTIFERAE

ILLICIACEAE:

1 endangered: *Illicium parviflorum*;

IRIDACEAE:

2 endangered: *Nemastylis floridana*, *Sphenostigma coelestinum*.

JUNCACEAE:

1 endangered: *Juncus gymnocarpus*.

LABIATAE:

16 endangered: *Conradina brevifolia*, *Conradina etonia*,
Conradina glabra, *Dicerandra christmanii*,
Dicerandra cornutissima, *Dicerandra frutescens*,
Dicerandra immaculata, *Macbridea alba*, *Ocimum campechianum*, *Salvia urticifolia*, *Scutellaria floridana*, *Scutellaria havanensis*, *Stachydeoma graveolens*, *Stachys crenata*, *Stachys tenuifolia*;
4 threatened: *Calamintha ashei*, *Calamintha dentata*,
Conradina grandiflora, *Physostegia godfreyi*,
Pycnanthemum floridanum.

LAMIACEAE: See LABIATAE

LAURACEAE:

4 endangered: *Licaria triandra*, *Lindera melissifolia*, *Lindera subcoriacea*, *Litsea aestivalis*.

LEGUMINOSAE:

20 endangered: *Acacia choriophylla*, *Acacia tortuosa*,
Aeschynomene pratensis, *Amorpha crenulata*,
Baptisia megacarpa, *Caesalpinia major*, *Caesalpinia*

pauciflora, *Cassia keyensis*, *Centrosema arenicola*,
Clitoria fragrans, *Crotalaria avonensis*, *Dalbergia brownii*, *Dalea carthagogenesis*, *Galactia smallii*,
Indigofera keyensis, *Lupinus aridorum*, *Rhynchosia swartzii*, *Stylosanthes calcicola*, *Tephrosia angustissima*, *Vicia ocalensis*;
7 threatened: *Baptisia hirsuta*, *Baptisia simplicifolia*, *Lupinus westianus*, *Pithecellobium keyense*, *Rhynchosia parvifolia*, *Senna mexicana*, *Tephrosia mohrii*.

LEITNERIACEAE: see SIMAROUBACEAE

LENTIBULARIACEAE:

2 endangered: *Pinguicula ionantha*, *Pinguicula primuliflora*;
3 threatened: *Pinguicula caerulea*, *Pinguicula lutea*, *Pinguicula planifolia*.

LILIACEAE:

4 endangered: *Erythronium umbilicatum*, *Lilium iridollae*,
Lilium michauxii, *Lilium superbum*;
1 threatened: *Lilium catesbaei*.
[See also: AMARYLLIDACEAE, AGAVACEAE,

3 endangered: *Linum arenicola*, *Linum carteri*, *Linum westii*.

LOBELIACEAE: see CAMPANULACEAE

LOGANIACEAE: see STRYCHNACEAE

LORANTHACEAE: see VISCACEAE

LYTHRACEAE:

3 endangered: *Cuphea aspera*, *Lythrum curtissii*, *Lythrum flagellare*.

MAGNOLIACEAE:

4 endangered: *Magnolia acuminata*, *Magnolia ashei*,
Magnolia pyramidata, *Magnolia tripetala*.

MALPIGHIACEAE:

1 threatened: *Byrsonima lucida*.

MALVACEAE:

6 endangered: *Callirhoe papaver*, *Cienfuegoscia yucatanensis*,
Gossypium hirsutum, *Hibiscus poeppigii*, *Kosteletzky
depressa*, *Pavonia paaludicola*.

MELANTHIACEAE:

4 endangered: *Aletris bracteata*, *Harperocallis flava*, *Veratrum woodii*, *Zigadenus leimanthoides*. Often included in LILIACEAE.

MELASTOMATACEAE:

1 endangered: *Rhexia parviflora*;

2 threatened: *Rhexia salicifolia*, *Tetrazygia bicolor*.

MELIACEAE:

1 threatened: *Swietenia mahagoni*.

MENISPERMACEAE:

1 endangered: *Cissampelos pareira*.

MIMOSACEAE: See LEGUMINOSAE

MONOTROPACEAE: see ERICACEAE

MYRTACEAE:

3 endangered: *Calyptranthes zuzygium*, *Eugenia confusa*,
Eugenia rhombea;
3 threatened: *Calyptranthes pallens*, *Myrcianthes fragrans*,
Psidium longipes.

NAJADACEAE:

1 threatened: *Najas filifolia*.

NYCTAGINACEAE:

2 endangered: *Okenia hypogaea*, *Pisonia rotundata*.

OLEACEAE:

2 endangered: *Chionanthus pygmaeus*, *Forestiera godfreyi*.

ORCHIDACEAE:

56 endangered: *Basiphyllaea corallicola*, *Brassia caudata*,

Bulbophyllum pachyrachis, Calopogon multiflorus, Campylocentrum pachyrrhizum, Corallorrhiza odontorhiza, Cranchis muscosa, Cyrtopodium punctatum, Eltroplectris calcarata, Encyclia boothiana, Encyclia coeruleata, Encyclia pygmaea, Epidendrum acunaee, Epidendrum anceps, Epidendrum difforme, Epidendrum nocturnum, Epidendrum rigidum, Epidendrum strobiliferum, Galeandra beyrichii, Goodyera pubescens, Govenia utricularia, Habenaria distans, Hexalectris spicata, Ionopsis utricularioides, Isotria verticillata, Leochilus labiatus, Lepanthes melanantha, Liparis nervosa, Macradenia lutescens, Malaxis unifolia, Maxillaria crassifolia, Maxillaria parviflora, Oncidium bahamensis, Oncidium floridanum, Oncidium luridum, Platanthera clavellata, Platanthera integra, Pleurothallis gelida, Polyradicion lindenii, Polystachya concreta, Ponthieva brittoniae, Prescottia oligantha, Spiranthes adnata, Spiranthes brevilabris, Spiranthes costaricensis, Spiranthes elata, Spiranthes ovalis, Spiranthes polyantha, Spiranthes torta, Triphora craigheadii, Triphora latifolia, Tropidia polystachya, Vanilla barbellata, Vanilla dilloniana, Vanilla mexicana, Vanilla phaeantha,
17 threatened: *Bletia purpurea, Cleistes divaricata, Harrisella filiformis, Listera australis, Platanthera blephariglottis, Platanthera ciliaris, Platanthera cristata, Platanthera flava, Platanthera nivea, Pogonia ophioglossoides, Pteroglossaspis ecristata, Spiranthes laciniata, Spiranthes longilabris, Spiranthes tuberosa, Stenorhynchos lanceolatus, Tipularia discolor, Triphora trianthophora;*
2 commercially-exploited: *Encyclia tampensis, Epidendrum conopseum.*

PALMAE:

- 4 endangered: *Pseudophoenix sargentii, Roystonea elata, Thrinax morrisii, Thrinax radiata;*
2 threatened: *Acoelorrhaphe wrightii, Coccothrinax argentata.*
1 commercially-exploited: *Rhipidophyllum hystrix.*

PARNASSIACEAE:

- 2 endangered: *Parnassia caroliniana, Parnassia grandifolia,*

PASSIFLORACEAE:

- 3 endangered: *Passiflora multiflora, Passiflora pallens, Passiflora sexflora.*

PHYTOLACCACEAE:

- 1 endangered: *Trichostigma octandrum.*

PICRAMNIACEAE:

- 2 endangered: *Alvaradoa amorphoides, Picramnia pentandra.*
Often placed in SIMAROUBIACEAE.

PIPERACEAE:

- 5 endangered: *Peperomia amplexicaulis, Peperomia glabella, Peperomia humilis, Peperomia magnoliifolia, Peperomia obtusifolia.*

POACEAE: See GRAMINEAE**POLYGALACEAE:**

- 2 endangered: *Polygala lewtonii, Polygala smallii.*

POLYGONACEAE:

- 4 endangered: *Eriogonum floridanum (= E. longifolium var. gnaphalifolium), Polygonella basiramia, Polygonella myriophylla, Polygonum meisnerianum;*

- 1 threatened: *Polygonella macrophylla.*

POTAMOGETONACEAE:

- 1 endangered: *Potamogeton floridanus*

PRIMULACEAE:

- 1 endangered: *Dodecatheon meadia.*

RANUNCULACEAE:

- 8 endangered: *Actaea pachypoda, Aquilegia canadensis, Delphinium carolinianum, Hepatica nobilis, Isopyrum*

Ranunculaceae (continued):

- biternatum, Thalictrum cooleyi, Thalictrum thalictroides, Xanthorhiza simplicissima.*

RHAMNACEAE:

- 4 endangered: *Colubrina arborescens, Colubrina cubensis, Colubrina elliptica, Ziziphus celata;*
1 threatened: *Reynosia septentrionalis*

ROSACEAE:

- 4 endangered: *Agrimonia incisa, Crataegus phaenopyrum, Physocarpus opulifolius, Prunus geniculata;*
2 threatened: *Malus angustifolia, Prunus myrtifolia.*

RUBIACEAE:

- 5 endangered: *Catesbea parviflora, Ernodea cokeri, Exostema caribaeum, Psychotria ligustrifolia, Strumpfia maritima;*
3 threatened: *Erithralis fruticosa, Pinckneya bracteata, Spermacoce terminalis.*

RUTACEAE:

- 3 endangered: *Zanthoxylum americanum, Zanthoxylum coriaceum, Zanthoxylum flavum.*

SALICACEAE:

- 2 endangered: *Salix eriocephala, Salix floridana.*

SAPINDACEAE:

- 3 endangered: *Cupania glabra, Dodonaea elaeagnoides, Hypelate trifoliata.*

SAPOTACEAE:

- 3 endangered: *Bumelia anomala, Bumelia lycioides, Bumelia thornei;*
2 threatened: *Chrysophyllum oliviforme, Manilkara jaimiqui.*

SARRACENIACEAE:

- 1 endangered: *Sarracenia leucophylla;*
4 threatened: *Sarracenia minor, Sarracenia psittacina, Sarracenia purpurea, Sarracenia rubra.*

SAXIFRAGACEAE:

- 1 endangered: *Lepuropetalon spathulatum.*

SCHISANDRACEAE:

1 endangered: *Schisandra coccinea*.

SCROPHULARIACEAE:

2 endangered: *Macranthera flammea*, *Schwalbea americana*.

SIMAROUBACEAE:

1 threatened: *Leitneria floridana*.

SMILACACEAE:

1 threatened: *Smilax havanensis*. Often placed in LILIACEAE.

SOLANACEAE: 1 threatened: *Solanum donianum*.

STAPHYLEACEAE:

1 endangered: *Staphylea trifolia*.

STEMONACEAE: see CROOMIACEAE

STRYCHNACEAE:

2 endangered: *Spigelia gentianoides*, *Spigelia loganioides*.

THEACEAE:

1 endangered: *Stewartia malacodendron*.

THEOPHRASTACEAE:

1 threatened: *Jacquinia keyensis*.

THYMELAEACEAE:

1 endangered: *Dirca palustris*.

TRILLIACEAE:

1 endangered: *Trillium lancifolium*.

ULMACEAE:

3 endangered: *Celtis iguanaea*, *Celtis pallida*, *Trema lamarckianum*.

UMBELLIFERAE:

3 endangered: *Cryptotaenia canadensis*, ***Eryngium cuneifolium***, *Oxypolis greenmanii*.

UVULARIACEAE: see COLCHICACEAE.

VERBENACEAE:

5 endangered: *Lantana canescens*, *Lantana depressa*, *Phyla stoechadifolia*, *Verbena maritima*, *Verbena tampensis*.

VIOLACEAE:

2 endangered: *Hybanthus concolor*, *Viola tripartita*.

VISCACEAE:

1 endangered: *Phoradendron rubrum*.

XYRIDACEAE:

4 endangered: *Xyris chapmanii*, *Xyris isoetifolia*, *Xyris longisepala*, *Xyris louisianica*;

1 threatened: *Xyris scabrifolia*.

ZYGOPHYLLACEAE:

1 endangered: *Guaiacum sanctum*.
